### **SPECIFICATION**

The traditional values of shipbuilding are transmitted with particular trepidation from generation to generation. The sea does not change, but the needs for the creation of new motor boats, for experienced captains, change. That is why the SKAGEN 50 was created - a motor yacht of a yachtsman - a boat with excellent seaworthiness, comfort, reliability and which, at the same time, can be managed by only one person. Skagen 50 has proven itself in the most difficult weather conditions with winds exceeding 60 knots at a speed of 14 knots. Excellent controllability and low wave formation are the best proof of perfectly balanced boat hull contours. In terms of living space SKAGEN 50 has no analogues. Standard equipment includes the maximum number of options from the best world manufacturers.
